

4-IN-ONE PLUMBING, GARBAGE, SEPTIC & SEWAGE

Nature's Pond '4-in-One Plumbing, Garbage, Septic & Sewage' is a highly concentrated mix of beneficial bacteria suspended in purified water - a simple, 'Ready-To-Use', safe and versatile product designed to clean all garbage surfaces, plumbing and drain systems. Its liquid form protects the bacteria from heat, cold and humidity, extending the shelf life to 24-30 months.

This bacteria blend has unique capabilities which enhances the natural metabolism of Fats, Oils and Greases (FOG) of human, animal and plant origin. Over 70% of odors in commercial and industrial buildings are caused from:

- Leaking organic waste from garbage in kitchens and garbage receptacle areas
- Fats oils and greases that clog up plumbing and drains in all building areas especially food courts and cafeterias
- Plumbing and drain back odors from kitchen sinks, bathroom drains and sewage pipes
- Compost and garbage Collection Areas in buildings

A clean building that smells badly is not clean and masking odors by using synthetic fragrances only serve to pollute the air quality in a building – leading to complaints of eye irritation, skin sensitivity, allergies, asthma etc...

Nature's Pond "4 IN ONE Plumbing, Garbage, Septic & Sewage" naturally formulated blend of bacteria has billions of CFU (Colony Forming Units) of bacteria per/gal which line the plumbing to ensure nothing sticks to the walls of the pipes and breaks up the dirt, oil and grease in garbage areas, making it easier for the bacteria to get to work. It consumes the FOGs and other organic matter which would otherwise remain in the plumbing and garbage disposal areas that build up over time causing rancid odors and drain clogs.

"4 IN ONE" is infused with Nature's Pond proprietary forest scent essential oil that deodorizes as it cleans.

It is also designed for the efficient bio-degradation of organic solids and waste of organic matter in sewage pipes that can impact back odors and facilitate plumbing clogs. This blend of bacteria also includes a special bacterial culture that consumes harmful phosphates; that are a major source of pollution into our ground and surface water. A huge environmental issue that is plaguing our freshwater resources around the planet.

Where can Nature's Pond '4-In-One Plumbing, Garbage, Septic & Sewage' be used?

- ✔ Regular and Waterless Urinals and Toilets
- ✔ Bathroom Drains and Sinks
- ✔ Garage Drains
- ✔ Sewage Pipes and Drains
- ✔ Garbage (Compact Disposal) Areas
- ✔ Plumbing connected appliances such as dishwashers and washing machines
- ✔ Food Courts and Kitchen Sinks and Drains
- ✔ Grease Traps

Living Better, Naturally!
Cleaning Better, Naturally!

Key Benefits

- ✔ Natural, Safe and Effective and reduces foul odors
- ✔ Reduces foul odors and naturally deodorizes as it cleans
- ✔ Keeps plumbing pipes open and clean with out using corrosive acids that harm plumbing and kills off beneficial bacteria in septic and sewage
- ✔ Reduces organic waste and speeds up the decomposition process in garbage areas where grease and organic waste is layered on surfaces
- ✔ Cleans dishwashers, washing machines and other plumbing connected appliances
- ✔ Reduces harmful phosphates that pollute ground water, soil, rivers and lakes
- ✔ Simple to use
- ✔ Environmentally-friendly

Application Rates

DO NOT DILUTE

Application	Rate
Regular and Water-less Urinals and Toilets	Spray daily in heavily used areas, 1 time per week for moderately used areas, 1 time per month in less frequently used areas. Spray to cover the surface area that is being cleaned.
Drains	Pour 250 ML (8.5 oz) daily in heavily used areas, 1 time per week in moderately used areas, 1 time per month in less frequently used areas.
Garbage Areas (Compact Disposal Areas, Kitchen Sink Garbage Areas, Food Court Garbage Areas - where ever organic garbage is being thrown away)	Spray daily in heavily used areas, 1 time per week for moderately used areas, 1 time per month in less frequently used areas. Spray to cover the surface area that is being cleaned.
Food Courts and Kitchen Sinks and Drains	Pour 250 ML (8.5 oz) daily in heavily used areas, 1 time per week in moderately used areas, 1 time per month in less frequently used areas.
Grease Traps	Pour 500 ML (16.9 oz) daily in heavily used areas, 1 time per week in moderately used areas, 1 time per month in less frequently used areas.
Bathroom Drains and Sinks	Pour 250 ML (8.5 oz) down bathroom showers, sinks and drains daily in heavily used areas, 1 time per week in moderately used areas, 1 time per month in less frequently used areas.
Dishwashers / Washing Machines and other plumbing connected Appliances	Pour 250 ML in a cool rinse cycle of an empty appliance; 1 time every 2 weeks for a heavily used appliance, 1 time per/month for a moderately used appliance; 1 time every 2 months for a less frequently used appliance

To Order

Available in 1 Gallon/ 3.78 Litres Containers and 5 Gallon/ 18.93 Litres Pails:

Size: 1 Gal/ 3.78 L Containers
SKU: 30412
UPC Code: 888935-00472-6

Size: 5 Gal/ 18.93L Pails
(Includes pump dispenser for ease of dilution and storage)
SKU: 30413
UPC Code: 888935-00473-3

Disclaimer: The manufacturer or the seller do not make any warranties concerning the use of this product other than those indicated on the label. The information provided is correct to the best of our knowledge, information and belief at the date of its publication. All products used are biodegradable, leaving no hazardous or complex residues. Nature's Pond '4-in-One Plumbing, Garbage, Septic & Sewage' is recognized as safe for humans and animal life. Nature's Pond '4-in-One' is meant to be used to treat commercial sinks and septic systems, garbage areas, regular and water-less urinals and toilets, restaurant & commercial grease traps and food processing plants, and has a suggested application rate depending on how often the area being treated is used.
