

INO view

2L and 4.5L Large Capacity Dispensing Systems

The INO view line of products of the INO derm family encompasses an entire variety of foaming soaps and lotions for a wide range of applications. The large capacity dispensing system is very simple as both the 2,000 ml and 4,500 ml cartridges are designed to be used in the same wall support dispenser.

The transparent cartridges make it very easy to see how much formula is left and when the cartridge should be changed. The soaps and lotions can be used in workshops, industries, schools and in most places where large capacity systems are required.
